

# YU YI

## AND YOUR DREAMS COME TRUE

Qeelin's Yu Yi collection draws together the threads of the countless myths and legends that surround the Chinese longevity lock. The Yu Yi design at the core of the collection is imbued with deep-rooted symbolism from the Middle Kingdom and combines cultural significance with technical acumen and fine craftsmanship.

Qeelin Creative Director, Mr. Dennis Chan, was first inspired to use the Chinese longevity lock symbol in a collection when he noticed these locks being worn as accessories in images of ancient China. It seems the locks were worn by both men and women, particularly during the Qing Dynasty. Further research unearthed a host of legends surrounding this powerful symbol.

The silhouette of Yu Yi resembles an ancient longevity lock, an herb of spiritual potency often used as a motif in classical art and crafts, and inspires thoughts of security and protection.

The pronunciation of 'Yu Yi' sounds similar to the Chinese expression '如意', which means "one able to manifest things at will and to bring ease, comfort and freedom to life". In other words, 'Yu Yi' makes 'Your Dreams Come True'.

The Yu Yi collection also includes one limited edition Grande Yu Yi pendant. The decorative links that hang from the pendant are detachable and replacements can be chosen from nine different options. Only eight pieces are available worldwide. Mr. Chan points out that this is the most technically advanced of Qeelin's collections. Traditional Chinese longevity locks are highly complex and are known for being somewhat challenging to open. The creation of this collection required new heights of craftsmanship and Mr. Chan worked in co-operation with craftsmen for over a year to perfect this authentic design.

The Yu Yi Collection includes necklaces, earrings, bracelets and rings, all crafted from the finest white gold and encrusted with E or F colour diamonds and rubies in shimmering pave or more subtle semi-pave. As always, the details of each piece have been carefully attended to. The pendants hang from chains designed specially for the collection and inspired by those worn in ancient times.
